

Kindergarten - School Age Summer Program

Week 1 - Growing Our Garden

Put on your gloves and get ready to spend time in the garden planting, weeding, harvesting and learning how to care for plants. Learn about pollinators like butterfly's and bees and why they are important to the environment. End the week by building a teepee fairy house for the garden!

Week 2 - Mad Science with Miss. Katie

Bring out your sense of wonder and curiosity and spend a week exploring cause and effect, neon glowing liquid, elephant toothpaste and more! Take your chances and try to walk on water!

Week 3 - Pint Sized Picassos

Explore different artistic techniques, using different motions. Art as a whole is a mental, physical and sometimes even emotional way of exploring the work around you. At the end of the week, work to recreate a scaled up version of a world famous piece.

Week 4 - A week On Stage

Acting as a whole is a very physical experience. – Participate in gross motor activities throughout the entirety of the week by means of skits and warm up games every day. At the end of the week be prepared to perform at the talent show!

Week 5 - Montessori Top Chef

Making bread and ice cream in a bag are both activities that involve a lot of team work and coordination. The bag will be tossed around and shaken up until the cream starts to form into a solid. The children will be able to see this reaction take place as we're finding tons of different ways to shake up our bags!

Week 6 - A Trip Through Time

Explore different cultures and go on a scavenger hunt to walk, run and climb to find small clues around the area. At the end of the scavenger hunt the children will find an artifact that they can study together in order to come to an understanding of its history.

Week 7 - Backyard Olympians

On your marks, get set, GO!!! Play a variety of sports including broom ball, carpet hockey, badminton and volleyball while developing basic movements to improve sports skills. Campers will create sports-related art and learn about athletics from around the world. This week is about sportsmanship and being active!

Week 8 - Blocks To Bricks

Spend the week building structures big and small. Explore different materials from Lego to things you find around the house. At the end of the week be prepared to build a large structure – this is sure to involve lots of teamwork and movement.

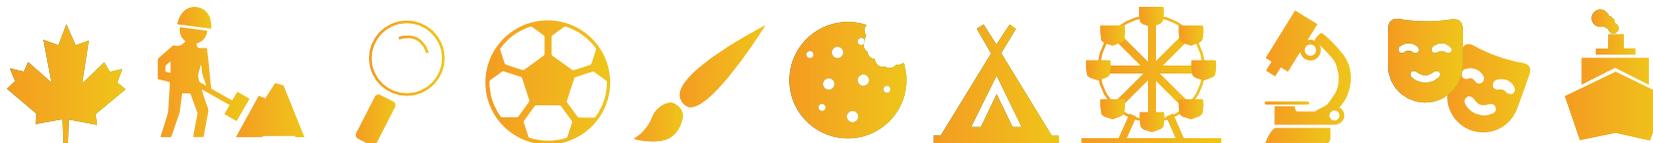

Week 9 - Symphony Of Senses

Explore your senses and use your body in order to interpret the world around you! On Friday, get ready to spend the day "geocaching"- an activity similar to a scavenger hunt.

Discovery Zone
